

INCIDENT MANAGEMENT SITUATION REPORT  
 THURSDAY, AUGUST 7, 1997 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION: Initial attack and large fire activity continued in Southern California with the mobilization of a Type I Incident Management Team and an Area Command Team to the Los Padres NF. Southern California also mobilized a Type II Incident Management Team to the Sequoia NF. Containment objectives were achieved on most of the large fires elsewhere. NICC processed resource orders for aircraft, equipment, crews and miscellaneous overhead in support of the large fires in California. Fire indices remain very high to extreme in California, Arizona and Nevada. Minnesota reported one unit with very high fire danger.

Seven California Department of Forestry engines were burned over on the Logan fire, Los Padres NF, yesterday afternoon. No injuries were reported. There was minor fire damage to two of the engines. Both engines are operational and are continuing to fight the fire. The Forest Service and California Department of Forestry are jointly investigating.

SOUTHERN CALIFORNIA LARGE FIRES:

An Area Command Team (Edrington) is assigned to the Los Padres National Forest.

LOGAN, Los Padres NF. A Type I Incident Management Team (Kohut) is assigned. The fire is located approximately 20 miles northeast of Santa Maria, CA. The blaze burned aggressively yesterday. Evacuation plans are being developed for several communities in the vicinity of the fire. Additional resources have been ordered to provide structure protection to these communities. Control problems include rugged terrain, dry weather, and 80 year old fuels.

HOPPER, Los Padres NF. A Type I Incident Management Team (Greenhoe) is assigned. The fire is burning in the Sespe Condor Sanctuary, north of Fillmore, CA. Active fire behavior was observed as the blaze doubled in size. Current threats are to homes, businesses, and recreational facilities in Piru.

CHOKE, Sequoia NF. A Type II Incident Management Team (Battreal) has been ordered. This lightning-caused fire is located in the Monarch Wilderness. Firefighters observed crowning and spotting up to a 1/4 mile ahead of the fire. Heavy fuels and extremely limited access are causing control problems.

ALASKA LARGE FIRES:

SIMELS, Galena District, BLM. Intermittent torching was reported on the southeast flank yesterday. Firefighters have made good progress toward containment objectives on the southern slopover.

PAIMIUT, Galena District, BLM. A Type II Incident Management Team (Wehking) is assigned. Minimal fire activity was observed inside containment lines. Firefighters continue working toward containment goals.

INOWAK, Southwest Area Forestry, Alaska State. A Type II Incident Management Team (Dube) is assigned. Unburned islands of fuel burned actively on the northeast flank of the fire. Demobilization of resources continues.

Alaska has 53 other large fires burning for a total of 1,780,878 acres.

WESTERN GREAT BASIN LARGE FIRES:

SUMMIT, Winnemucca District, BLM. This fire is located 70 miles northwest of Winnemucca, NV. Erratic winds caused by passing thunderstorms increased fire activity. Wildlife habitat is currently threatened.

OUTLOOK:

A RED FLAG WARNING HAS BEEN POSTED FOR THE NORTHERN SACRAMENTO VALLEY OF CALIFORNIA FOR STRONG NORTH WINDS AND LOW RELATIVE HUMIDITY

Northern California will have north winds up to 25 MPH and relative humidity of 10% in the Sacramento valley. The rest of the state will be hot and dry. Isolated dry thunderstorms are forecast in the southern mountains and central Sierras. Temperatures in the mountains and along the coast will range from the 80's to 100. Desert highs will be 105 to 110.

Washington and Oregon will be very dry and locally breezy. Western Washington will have highs in the 70's and 80's and western Oregon will have temperatures near 100. Temperatures east of the Cascades will be in the 80's and 90's in both states.

Nevada will be partly cloudy and hot, with isolated afternoon thunderstorms over the northern mountains. High temperatures will range from 90 to 103 in the north, and from 106 to 116 in the south.

Utah will be mostly sunny with a few showers and thunderstorms over the southeast mountains. Northern temperatures will be in the 80's and low 90's, with southern highs climbing to 105.

Alaska will be mostly cloudy with a chance of showers and isolated thunderstorms. Temperatures across the state will be in the 60's and 70's.

New Jersey will be mostly sunny and dry with highs in the 80's. Michigan and Minnesota will be dry and a little warmer with temperatures in the 70's and 80' s.
